ASP.NET WEB APPLICATION – ASSIGNMENT

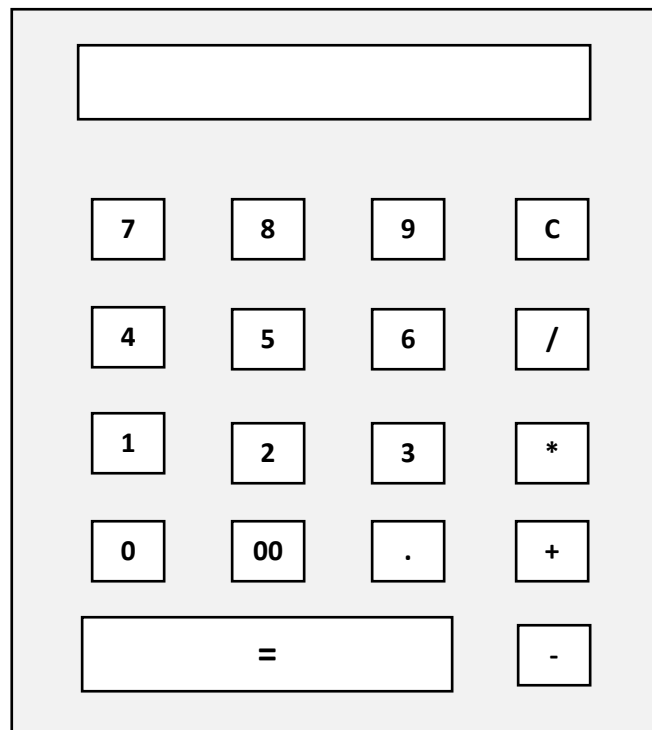

Instructions:

1. Attempt all questions
2. For Question Two, take screenshots of both the Front End & the Back end along with the output.

Question One:

With the aid of a process diagram, describe the sequence of events/data flow in an ASP.NET web application.

Question Two:

Required:

- a) Open your ASP.NET C# application (Visual Studio), create a new project and name it “Calculator”.

- b) Design the above interface with buttons as it appears.
- c) Make events to the buttons that you have dragged and dropped.
- d) Declare a switch statement to enable you to use the different arithmetic operators.
- e) Save your project files as your name in the folder you created on the desktop.

NB: Assignment to be submitted electronically to babairecornelius@gmail.com not later than **23:59 hrs 21/01/24** for **Batch 1** and **23:59 hrs 22/01/24** for **Batch 2**. Document should be saved in your **full names**.
